Hack the Stackathon

Saturday, January 31st
8:00am-8:00pm

*A builder-focused hackathon for data, AI, and modern tooling,
hosted by Firecrawl, Reducto, and Resend.*
January 31, 2026 | Y Combinator Headquarters, SF

Sponsors

A BIG thank you to our sponsors. They made this hackathon possible!
Headliner Sponsor: **MongoDB**
Gold Level Sponsors: **Open Router**, **Supabase**
Silver Level Sponsors: **Algolia**, **ElevenLabs**, **Lovable**, **Mux**

What Every Builder Gets

- **Firecrawl Hobby Plan**
  One month of free access to start building with real web data
- **15,000 Reducto Credits**
  Use **Reducto** to parse, structure, and extract data from complex documents at scale
- **1 month of Resend Pro**
  Use **Resend's** generous free tier; higher limits unlocked if you hit caps
- **Supabase Deal**
  All attendees are eligible for the YC Student Deal ($300 in credits)
- **200 Lovable Credits**
  Use the vibe-coding tool to prototype, experiment, and ship fast
- **ElevenLabs Creator Plan**
  3 months of access for high-quality text-to-speech and voice generation
- **$500 of Mux Credits**
  Use **Mux** to build video into anything from websites to platforms to AI workflows
- **Meals & Swag**
  All meals covered plus thoughtful, limited-run swag from **Firecrawl**, **Reducto**, and **Resend**, plus select sponsors.

How We Will Judge/List of Judges

We care about systems that work, not demos that look good. We will prioritize:

- **Real data ingestion**
  Live inputs from the web, documents, or communication channels. Not mock data.
- **Working systems, even if they're ugly**
  We value functionality, resilience, and effort over polish.
- **Thoughtful tradeoffs**
  Clear decisions about scope, architecture, and constraints. Tell us what you chose not to do and why.

We will actively de-prioritize slide-only demos, fake data, and projects that never left localhost.
